## DREAM GARAGE AND AUTOSCOPE ANNOUNCE SERVICE AND CONCIERGE PROGRAM

**Dallas — January XX, 2007** — Executives with Dream Garage USA announced today an agreement with Autoscope to offer repair and concierge services at the Dallas flagship facility and other locations throughout the United States. Under the agreement, Autoscope will build a top flight repair center at Dream Garage Dallas and other Texas locations, as well as have the option to be part of subsequent facilities.

“One of the cornerstones of the Dream Garage concept is the inclusion of a high-end repair facility and auto related retail space in every location,” said Jack Griffin, one of the principals in the project. “We were in negotiations with Nerces Mavelian of Autoscope before the flagship Dallas location was announced and we’re pleased to announce that an agreement has been finalized to make his high end facility a part of our project. Autoscope will also have the first right to be inside each Dream Garage location we open across the United States.”

Dream Garage is a national group of luxury garage suites that feature secure, upscale, private automotive condos for prized collections. Each Dream Garage will feature a high-end repair facility specializing in the maintenance and repair of exotic, luxury and classic automobiles. In addition, locations will include a Retail-Flex shopping area and a complete concierge service that caters to the automotive needs of discriminating enthusiasts.

The first two Dream Garage locations will be in the Dallas / Ft. Worth area, with additional facilities in Houston, Los Angeles, San Francisco, Scottsdale, Atlanta, Chicago, Miami, Seattle, Long Island and Connecticut. Each facility will be branded with a city’s name to cement its local roots. Dream Garage members will own their individual garage suite and inquiries for locations across the U.S. have been brisk since the project was announced.

A family owned business for over 25 years, Autoscope has earned a reputation for outstanding work, as well as a talent for upgrading the performance of all makes of luxury, exotic and performance vehicles. All vehicles are repaired to the highest standards by factory-trained technicians using the latest in high tech equipment to diagnose and repair a car. Autoscope is an authorized Dinan performance shop and has prepared many vehicles for racing applications. This will be the company’s third location in North Texas, which will include a set of chassis dyno’s so customers can “race” their vehicles in the shop.

## **Dream Garage Announces Agreement with Autoscope (2/2)**

“We cater to automobile owners who expect ‘Neiman Marcus’ levels of service and quality,” noted Mr. Mavelian. “Our goal is to bring this same level of service to suite owners at Dream Garage. Combining stylish garage suites and a private club atmosphere with our world-class capabilities will make Dream Garage the heartbeat of the auto enthusiast community. We look forward to the opening of the first Dream Garage later this year.”

Beginning at 1050 sq. ft., Dream Garage suites will be privately owned and custom designed to match the needs and personality of its owner. Amenities will include tile floors, art, lifts, and viewing lofts.. Each will be named in honor of a famous international racing landmark or personality.

All facilities will be near the homes, businesses and activities that members typically enjoy. Being in the heart of major metros like Dallas, Chicago or San Francisco will make ownership of vehicles more enjoyable because they provide easy access to collections.

“We’re finding that Dream Garage owners have many vehicles in their stable and want to be able to enjoy driving them,” explained Griffin. “It’s so deflating to walk into the garage and find a collector car has a flat tire, discharge battery or dirty carburetor. Autoscope will offer a concierge service that will help ensure suite owner’s vehicles are ready to go when they are. With one call, Autoscope will ensure an owner’s vehicle is road-ready in every respect. That includes servicing and detailing, as well as making arrangements to pick a suite owner up.”

TreVista Group L.P., is the real estate development partnership and builder behind Dream Garage. The Dallas-based company is directed by Jerry Mooty and Travis Blalock, who are developing the national chain with Dream Garage conceptual creator and co-founder, Jack Griffin.

Dream Garage Dallas will be located near Love Field in Dallas. The group will break ground on their flagship facility during early 2007; construction is slated for March with completion expected within 10 months.

### **About Dream Garage**

Headquartered in Dallas, Dream Garage USA is a group of garage suite facilities to be built in select cities across the country, featuring high-end residencies for collectors of luxury, muscle and vintage automobiles and motorcycles. Created by TreVista Group L.P., the upscale garage suite locations include a high-end auto repair facility retail-flex shopping and a member’s club. Locations are planned for major cities nationwide.
